EZ Prompter Laptop Mount

What's Included:

a. (1) EZ Prompter LCD Mount	 A black metal LCD mount with a central rectangular cutout and several mounting holes along its edges.
b. (1) Thumb Screw	 A black thumb screw with a rounded, three-lobed head and a threaded shaft.
c. (1) Allen Wrench	 A black L-shaped Allen wrench with a long handle and a shorter, angled end.

EZ Prompter Laptop Mount Instructions

<p>1. Pick balance hole for tripod's quick release plate based on where you think it may balance with your camera. For heavier cameras, mount towards back holes. For lighter cameras, mount towards front holes. It may take a few attempts to find the best hole to properly balance your camera.</p>	 A hand is shown holding the black LCD mount against a metal plate with several circular holes, demonstrating how to position it.
<p>2. Screw quick release plate into position.</p>	 A hand is shown using a thumb screw to secure the LCD mount to the metal plate.

3. Mount on Tripod

4. Adjust mount extensions. Height and position can be adjusted for different sized cameras. Use allen wrench provided to tighten extensions into position.

5. Remove paper tray from EZ Prompter.

6. Attach EZ Prompter to camera lens.

7. Place your laptop on laptop tray with screen pointing forward.

8. Put camera mounting screw through appropriate slot depending on camera size.

9. Mount camera to top plate by tightening screw.

10. Adjust camera position to align mirror over screen. Lens should be in the center of the screen.

11. This is how your final setup should look like. You're now set and ready to go!

Note:

Laptop tray is on sliders, and will slide to the left. In this position, it is easy to operate the keyboard, and make changes anytime you want. Sliding tray locks into place when pushed to the right.

**Thank you very much for using BarberTech Video Products!
We appreciate your business and
We look forward to working with you in the future.**
